SUMMARY

- Motivated and aspiring Front-end Developer with a strong foundation in React.js and JavaScript. Passionate about creating user-friendly, visually engaging, and intuitive interfaces. Seeking to join a collaborative development team where I can contribute my project experience, learn from others, and continue to grow my expertise in front-end development.

PROJECTS

E-commerce Website

[Home Bakery E-commerce Website \(on going\)](#)

- Developing a responsive e-commerce site for my home bakery using React, Bootstrap, React-Bootstrap, and Next.js. Integrated Email.js for efficient customer inquiries. This project highlights my skills in modern web technologies, user-friendly design, and creating engaging online experiences.

PROTFOLIO

[Eswar Portfolio](#)

- My portfolio reflects my identity and highlights all of my projects, making it easy for you to explore them.
- I learned to manage REACT components and implement functionality using JAVASCRIPT, deepening my knowledge of state management and hooks. This process helped me establish a strong foundation in REACT, I also used the NEXT.JS for smooth navigation and Higher Flexibility and Customization.
- I utilized BOOTSTRAP for styling my portfolio to improve my CSS skills and establish a solid foundation in this area, along with adding a EMAIL.JS feature for sending messages.
- I made sure the portfolio is fully responsive because of I have used REACT BOOTSTRAP, which helped me develop the skills needed to create an engaging and adaptable user experience.

ADDITIONAL PROJECTS

- Built foundational projects such as a calculator, a to-do app, and a weather app, demonstrating my core web development skills and eagerness as a fresher to learn and contribute effectively.
